### **Abstract**

The values represent what a person considers important in life. They comprise the individual's philosophy of life. These values provide the prime motivating force behind man's thoughts, emotions, and actions. In this context, the researchers have studied values among technical and non-technical undergraduate students. "A New Test for Study of Values" by Sashi Gilani, value inventory administered on 200 undergraduate students randomly selected from private universities located in Bhopal city. The data was analyzed with the help of mean, SD, and 't' values. Null hypotheses were found to be accepted.

**Keywords:** value, technical, non-technical, students, trainees
